Tapping into Halloween to make IG's announcement more engaging (1/2)

Well, this is what IG had to say:

Starting today, we're combining IGTV and feed videos into one format - Instagram Video. We're also introducing a new Video tab on your profile, where this combined video format will live, to make it easier for people to discover new video content. We love that our creator community has embraced video as a key format to tell their stories, entertain, and connect with their audiences, and that's why we want to make it even simpler to create and discover videos on Instagram.
